Bandits at Sea

Examines the truth behind the mythical portrayals of pirates and piracy, including discussion on the purposes of "countercultural social bandits," women pirates, and
democracy and racial equality practiced on pirate ships.

For the first time, Jewish history is presented according to authentic Jewish sources; well researched and clearly illustrated with photos, charts, and maps.

Vol. I: The Second Temple Era: The era of the Second Commonwealth from the Destruction of the First Temple to the

Destruction of the Second.

In this classic work George Hourani deals with the history of the sea trade of the Arabs in the Indian Ocean from its obscure origins many

centuries before Christ to the time of its full extension to China and East Africa in the ninth and tenth centuries. The book comprises a brief but masterly historical account

that has never been superseded.

The author gives attention not only to geography, meteorology, and the details of travel, but also to the ships themselves, including a
discussion of the origin of stitched planking and of the lateen fore-and-aft sails.

Piracy in the Indian Ocean, day-to-day life at sea, the establishment of ancient lighthouses

and the production of early maritime guides, handbooks, and port directories are all described in fascinating detail. Arab Seafaring will appeal to anyone interested in Arab

life or the history of navigation. For this expanded edition, John Carswell has added a new introduction, a bibliography, and notes that add material from recent

archaeological research.

Written by a senior scholar and master mariner, Sailors and Traders is the first comprehensive account of the maritime peoples of the Pacific.

It focuses on the sailors who led the exploration and settlement of the islands and New Zealand and their seagoing descendants, providing along the way new material and

unique observations on traditional and commercial seagoing against the background of major periods in Pacific history.

The book begins by detailing the traditions of sailors, a group whose way of life sets them apart. Like all others who live and work at sea, Pacific mariners face the challenges of an often harsh environment, endure

separation from their families for months at a time, revere their vessels, and share a singular attitude to risk and death.

The period of prehistoric seafaring is discussed

using archaeological data, interpretations from interisland exchanges, experimental voyaging, and recent DNA analysis. Sections on the arrival of foreign exploring ships
centuries later concentrate on relations between visiting sailors and maritime communities.

The more intrusive influx of commercial trading and whaling ships brought new technology, weapons, and differences in the ethics of trade.

The successes and failures of Polynesian chiefs who entered trading with European-type ships are recounted

as neglected aspects of Pacific history.

As foreign-owned commercial ships expanded in the region so did colonialism, which was accompanied by an increase in the

number of sailors from metropolitan countries and a decrease in the employment of Pacific islanders on foreign ships.

Eventually small-scale island entrepreneurs expanded interisland shipping, and in 1978 the regional Pacific Forum Line was created by newly independent states. This was welcomed as a symbolic return to indigenous Pacific ocean linkages.

The book’s final sections detail the life of the modern Pacific seafarer.

Most Pacific sailors in the global maritime labor market return home after many months at sea, bringing money, goods, a wider perspective of the world, and sometimes new diseases.

Each of these impacts is analyzed, particularly in the case of Kiribati, a major supplier of labor to foreign ships.

Exploring history in global framework, Lockard’s SOCIETIES, NETWORKS, AND TRANSITIONS,

VOLUME I: TO 1500: A GLOBAL HISTORY, Fourth Edition, combines the accessibility and cultural richness of a regional approach with the rigor of comparative scholarship.

Emphasizing culture, social change, gender issues, economic patterns, science and religion, it helps you unravel the connections, encounters, cooperation and conflicts of world and regional history.

The author includes profiles of individuals from various walks of life as well as highlights social life and cultural artifacts such as

music, literature and art. Extensively revised, the text incorporates recent scholarship throughout, examines various debates among historians and explains how historians use original documents. Insightful questions help you reflect on the historical significance of text material – and how it relates to you. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
world, Michael J. Jarvis recovers a mariner's view of early America as seen through the eyes of Bermuda's seafarers. The first social history of eighteenth-century Bermuda, this book profiles how one especially intensive maritime community capitalized on its position "in the eye of all trade." Jarvis takes readers aboard small Bermudian sloops and follows white and enslaved sailors as they shuttled cargoes between ports, raked salt, harvested timber, salvaged shipwrecks, hunted whales, captured prizes, and smuggled contraband in an expansive maritime sphere spanning Great Britain's North American and Caribbean colonies. In doing so, he shows how humble sailors and seafaring slaves operating small family-owned vessels were significant but underappreciated agents of Atlantic integration. The American Revolution starkly revealed the extent of British America's integration before 1775 as it shattered interregional links that Bermudians had helped to forge. Reliant on North America for food and customers, Bermudians faced disaster at the conflict's start. A bold act of treason enabled islanders to continue trade with their rebellious neighbors and helped them to survive and even prosper in an Atlantic world at war. Ultimately, however, the creation of the United States ended Bermuda's economic independence and doomed the island's maritime economy. While cat owners adore their purring, fuzzy friends, cats can have another, rather unpleasant, side. Some pee on carpets, shred upholstery, chomp houseplants, caterwaul at all hours, and scratch and bite. Skeptics will claim that it's impossible to train a cat. Happily, Wendy Christensen knows they're wrong. True, cats are intelligent, adaptable, patient, independent, stubborn, observant, and extremely quick learners. But they're also remarkably self-interested and quick to exploit a good deal. Outsmarting Cats enables you to persuade your cat that what you want is also what she wants. Whatever your specific cat problem, Wendy Christensen gives all the latest information on what works, and what doesn't. She shares tried-and-true tips and resources for resolving even the thorniest behavior problems. And she'll tell you how to head off future problems, simply by understanding how your cat thinks. The Student Study Guide is an important and unique component that is available for each of the eight books in The World in Ancient Times series. Each of the Student Study Guides is designed to be used with the student book at school or sent home for homework assignments. The activities in the Student Study Guide will help students get the most out of their history books. Each Student Study Guide includes chapter-by-chapter two-page lessons that use a variety of interesting activities to help a student master history and develop important reading and study skills. Developed to meet the demand for a low-cost, high-quality history book, this economically priced version of WORLD HISTORY, 8th Edition, offers readers the complete narrative with only the most essential features, photos, and maps. All volumes feature a paperback, two-color format that appeals to those seeking a comprehensive, trade-sized history text. Noted teachers and scholars William J. Duiker and Jackson J. Spielvogel present a balanced, highly readable overview of world history that explores common challenges and experiences of the human past, and identifies key patterns over time. Thorough coverage of political, economic, social, religious, intellectual, cultural, and military history is integrated into a chronological framework to help students gain an appreciation and understanding of the distinctive character and development of individual cultures in society. This approach helps students link events together in a broad comparative and global framework, and consequently see the contemporary world in a more meaningful historical context. CENGAGE ADVANTAGE BOOKS: WORLD HISTORY includes over 100 maps and excerpts of over 100 primary sources that enliven the past while introducing students to the source material of historical scholarship. Available in the following split options: CENGAGE ADVANTAGE BOOKS: WORLD HISTORY, 8th Edition (Chapters 1?30); Volume I: To 1800 (Chapters 1?18); Volume II: Since 1500 (Chapters 14?30). Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Nine papers examines a specific body of archaeological data - from societies including Minoan Crete, ancient Zimbabwe and the Maya - in order to discuss the role of women in the evolution of states. This popular text advocates an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers. Based in practice and experience, it offers systematic support and open, honest advice for new teachers, is conversational not pedantic, and provides lots of examples. While the structure and most of the topics remain largely the same as before, this Third Edition presents new lesson ideas in every chapter especially designed to help new teachers to address learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms puts a heavier focus on what is important to know and why includes new essays on the politics of social studies education responds to opponents of project- or activity-based social studies instruction and multicultural education with a sharpened defense of both of these approaches throughout the book intended as a text for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice. In Ethnic Identity and Minority Protection: Designation, Discrimination, and Brutalization, Thomas W. Simon examines a new framework for considering ethnic conflicts. In contrast to the more traditional theories of justice, Simon's theory of injustice shifts focus away from group identity toward group harms, effectively making many problems, such as how to define minorities in international law, dramatically more manageable. Simon argues that instead of promoting legislative devices like proportional representation for minorities, it is more fruitful to seek adjudicative solutions to racial and ethnic-related conflicts. For example, resources could be shifted to quasi-judicial human-rights treaty bodies that have adopted an injustice...
approach. This injustice approach provides the foundation for Kosovo's case for remedial secession, and helps to sort out the competing entitlement claims of Malays in different countries. Indeed, the priority of Thomas W. Simon's Ethnic Identity and Minority Protection is to ensure the tales of designation and discrimination told at the beginning of the work do not become the stories of brutalization told at the end. In short, the challenge tackled in this text is to assure that reason reigns over hate. This book is a study of the seafaring communities of the Arabian Gulf and Oman in the past 150 years. It analyses the significance of the dhow and how coastal communities interacted throughout their long tradition of seafaring. In addition to archival material, the work is based on extensive field research in which the voices of seamen were recorded in over 200 interviews. The book provides an integrated study of dhow activity in the area concerned and examines the consciousness of belonging to the wider culture of the Indian ocean as it is expressed in boat-building traditions, navigational techniques, crew organisation and port towns. People of the Dhow brings together the different measures of time past, the sea, its people and their material culture. The Arabian Gulf and Oman have traditionally shared a common destiny within the Western Indian Ocean. The seasonal monsoonal winds were fundamental to the physical and human unities of the seafaring communities, producing a way of life in harmony with the natural world, a world which was abruptly changed with the discovery of oil. What remains is memories of a seafaring past, a history of traditions and customs recorded here in the recollections of a dying generation and in the rich artistic heritage of the region. The annotated and translated letters of 11th-12th century traders of the Jewish Indian Ocean, found in the Cairo Geniza, provide fascinating information on commerce between the Far East, Yemen and the Mediterranean, medieval material, social, and spiritual civilization among Jews and Arabs, and Judeo-Arabic. This is a comprehensive study of Bronze Age ships and seafaring in the eastern Mediterranean, the principal means of contact between different cultures in this period. It deals with seagoing ships in the cultures bordering the eastern Mediterranean, starting with Egypt and following the trade routes. Seven primary aspects of seafaring are dealt with: ship construction, propulsion, anchors, navigation, sea trade, war and piracy and laws of the sea. Quilting has a rich history in Maine and America and its popularity has surged in recent years as people return to traditional handcrafts. The history of quilting in Maine is a story of community and Maine State Museum curator Laurie LaBar coaxes stories out of objects and uses those stories to enlighten, entertain, and bring new voices to Maine history. The first book of its kind, Maine Quilts 250 Years of Comfort and Community is the accompanying volume to a major two-year exhibit at the Maine State Museum. Stories abound, and lesser known aspects of the state's history are brought to light, but the star attractions are the quilts themselves. Ranging from surviving Colonial era quilts to present day creations, more than 150 are presented in full color. In 1690, a dramatic account of piracy was published in Mexico City. The Misfortunes of Alonso Ramírez describes the incredible adventures of a poor Spanish American carpenter who was taken captive by British pirates near the Philippines and forced to work for them for two years. After circumnavigating the world, he was freed and managed to return to Mexico, where the Spanish viceroy commissioned the well-known Mexican scholar Carlos de Sigüenza y Góngora to write down Ramírez's account as part of an imperial propaganda campaign against pirates. The Misfortunes of Alonso Ramírez has long been regarded as a work of fiction—in fact, as Latin America's first novel—but Fabio López Lázaro makes a convincing case that the book is a historical account of real events, albeit full of distortions and lies. Using contemporary published accounts, as well as newly discovered documents from Spanish, English, French, Portuguese, and Dutch archives, he proves that Ramírez voyaged with one of the most famous pirates of all time, William Dampier. López Lázaro's critical translation of The Misfortunes provides the only extensive Spanish eyewitness account of pirates during the period in world history (1650–1750) when they became key agents of the European powers jockeying for international political and economic dominance. An extensive introduction places The Misfortunes within the worldwide struggle that Spain, England, and Holland waged against the ambitious Louis XIV of France, which some historians consider to be the first world war. Developed to meet the demand for a low-cost, high-quality history book, this economically priced version of WORLD HISTORY, 8th Edition, offers readers the complete narrative with only the most essential features, photos, and maps. All volumes feature a paperback, two-color format that appeals to those seeking a comprehensive, trade-sized history text. Noted teachers and scholars William J. Duiker and Jackson J. Spielvogel present a balanced, highly readable overview of world history that explores common challenges and experiences of the human past, and identifies key patterns over time. Thorough coverage of political, economic, social, religious, intellectual, cultural, and military history is integrated into a chronological framework to help students gain an appreciation and understanding of the distinctive character and development of individual cultures in society. This approach helps students link events together in a broad comparative and global framework, and consequently see the contemporary world in a more meaningful historical context. CENGAGE ADVANTAGE BOOKS: WORLD HISTORY includes over 100 maps and excerpts of over 100 primary sources that enliven the past while introducing students to the source material of historical scholarship. Available in the following split options: CENGAGE ADVANTAGE BOOKS: WORLD HISTORY, 8th Edition (Chapters 1?30): Volume I: To 1800 (Chapters 1?17); Volume II: Since 1500 (Chapters 14?30). Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Reproduction of the original. Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global
history and why. It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity, history, and the contemporary world. All chapters include lesson ideas, a sample lesson plan with activity sheets, primary source documents, and helpful charts, graphs, photographs, and maps. High school students’ responses are woven in throughout. Additional material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer. The traditional curriculum tends to highlight the Western heritage, and to race through epochs and regions, leaving little time for an in-depth exploration of concepts and historical themes, for the evaluation of primary and secondary sources, and for students to draw their own historical conclusions. Offering an alternative to such pre-packaged textbook outlines and materials, this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it. As the colonial hegemony of empire fades around the world, the role of language in ethnic conflict has become increasingly topical, as have issues concerning the right of speakers to choose and use their preferred language(s). Such rights are often asserted and defended in response to their being violated. The importance of understanding these events and issues, and their relationship to individual, ethnic, and national identity, is central to research and debate in a range of fields outside of, as well as within, linguistics. This book provides a clearly written introduction for linguists and non-specialists alike, presenting basic facts about the role of language in the formation of identity and the preservation of culture. It articulates and explores categories of conflict and language rights abuses through detailed presentation of illustrative case studies, and distills from these key cross-linguistic and cross-cultural generalizations. Reveals a distinct trajectory of Islamic history that developed among Muslim merchant communities across the medieval Indian Ocean. A compelling view of two competing religious visions—one of “creation” and the other of “empire”—that run throughout the Bible. “A remarkable offering for those who care about the interface of power and faith with all the threats and seductions that go with it. . . As I read, I felt overwhelmed, both by the mass of data and by the cunning of interpretation. I could not put it down, and expect to continue to be instructed by it.”—Walter Brueggemann “Howard-Brook undertakes what few dare anymore: an introductory primer for the whole Bible. This book invites disciples to connect the dots, in order to recover our ancient, anti-imperial identity, and to embrace a radical faith and practice that are personal and political.”—Ched Myers “Howard-Brook illuminates how ancient empires exercised control and manipulation of people not simply by political and military means, but also through the religion of empire. Throughout he makes clear that the core message of the God of creation is to call people out of empire, to refuse to cooperate with the forces of destruction and domination today.”—Richard Horsley “Will become a classic for communities that seek first to receive the gracious gift of God's alternative future to Empire.”—Jarrod McKenna “If we who sojourn in America are to be a community that can both name and resist the lure of Empire, we need a story more powerful than the story called America. Wes Howard-Brook knows than the Bible tells such a story. May its story be ours as we're set free from our imperial imaginations to dream with our Creator of a new world here and now.”—Jonathan Wilson-Hartgrove A survey of the rational, organized, thriving, scripturally informed and Holy Spirit-inspired roots of indigenous Christianity in Africa. Christian faith communities there had existed centuries before the First Council of Nicaea, before Rome adopted Christianity, before the Byzantine Empire and before King James commissioned a compilation of the Bible. African Christians’ faith in Jesus Christ, perseverance, suffering, sacrifice, exegetical principles, theological dogma and canonical processes were instrumental to the foundation and institutions of Western Christianity. In this comprehensive history of Homer’s references to ships and seafaring, author Samuel Mark reveals patterns in the way that Greeks built ships and approached the sea between 850 and 750 b.c. To discuss and clarify the terms used by Homer, Mark draws on scholarly literature as well as examples from recent excavations of ancient shipwrecks. Mark begins by emphasizing the importance of the household during a period in which chiefs ruled and Greek nobles disdained merchants and considered seafaring a necessary but less than distinguished activity. His chapter on Odysseus’s construction of a ship includes discussions of the types of wood used. He concludes that most Greek ships were of laced, rather than pegged mortise-and-tenon construction. Mark goes on to discuss characteristics of Homeric ships and their stern ornaments, oars, quarter rudders, masts, mast-steps, keels, ropes, cables, and planks. Mark reaches several surprising conclusions: that in an agricultural society, seafaring was a common activity, even among the nobles; that hugging the coast could be more treacherous than sailing across open sea; that Homeric ships were built mainly to be sailed, instead of rowed; that sea battles were relatively common; that helmsmen were crucial to a safe voyage; and that harbors were little more than natural anchorages. Mark’s discussion of Homer’s geography covers theories that posit Odysseus sailing in the Adriatic and Mediterranean Seas and even on the Atlantic Ocean. As befits a study whose subjects are partly historical, partly archaeological, and partly myth and legend, Mark’s conclusions are tentative. Yet, this comprehensive and meticulous study of Homer’s references to ships and seafaring is sure to become a standard study on the subject. This is an archaeological study of the Indian subcontinent's ancient maritime history, before European expansion. Malay society of the past has usually been characterized by the presence of the peasantry, a pre-modern class of producers, tied to the land and beholden to a feudalistic or feudal-like ruling structure. In contrast, this book explores the diversity which in fact colours the economic history of the Malays. The subject of this book is a relatively unknown class of people, the handloom weavers, who played a decisive role in the economies of the eastern Malay states of
Terengganu, Kelantan, and Pahang. Today, the products of these handloom weavers, the beautiful hand-woven sarongs and cloths, grace the most elegant and auspicious of occasions. What is the story behind the vicissitudes, often brutal, of textile production in the early or proto-industrial phases of the Malay economy? Why was the handloom industry, at its height, halted from realizing its full potential of transforming into a full-fledged industrial manufacture? What exactly is the putting-out system of production and how did men and women actualize their roles in such production regimes? Why did the putting-out system endure? In answering such questions this book explores the origins of the Malay handloom industry, its technology, its people, and its turbulent relationship with the ambitions of both the colonial and modern nation-states.

In this volume Professor Sen McGrail introduces the reader to a relatively new branch of Archaeology the study of water transport how early rafts, boats and ships were built and used. Concepts, such as boatbuilding traditions, ship stability and navigation without instruments, are first described. Archaeological research is then discussed, including sea levels in earlier times, how to distinguish the vestigial remains of a cargo vessel from those of a fighting craft; and the difference between a boat and a ship. Chapters 2 and 3, the heart of the text, deal with the early water transport of the Mediterranean and Atlantic Europe, from the Stone Age to Medieval times. Each chapter includes a description of the region's maritime geography and an exposition of its boat-building traditions. The third element is a discussion of the propulsion, the steering and the navigation of these early vessels. The sparse, often jumbled, remains of excavated vessels have to be interpreted, a process that is assisted by consideration of early descriptions and illustrations. Studies of the way traditional builders of wooden boats ply their trade today are also a great help. Experimental boat archaeology is still at an early stage but, when undertaken rigorously, it can reveal aspects of the vessel's capabilities. Such information is used in this volume to further our understanding of data from boat and ship excavations, and to present as coherent, comprehensive and accurate a picture as is now possible, of early European boatbuilding and use. In the Great War, every act of courage counted. The Goat: A Natural History offers a complete overview of this captivating creature, from the goatish Greek god Pan, to their cognitive capacity and typical milk yields. It is no secret that goats are highly intelligent. They are also curious, gentle, independent, very social, and full of character. They hate to get wet and will avoid puddles. Among the first domesticated animals, goats are a common character in western mythology. In ancient Greece, Crete, and Egypt, goats even received divine honours. Goats are increasingly appreciated for their high adaptability to a wide variety of environmental conditions, and will thrive in the warmer, dryer world of the future. This book reveals everything you need to know about the natural history of a fascinating animal. "Neumann's main concern is with the very essence of the historical enterprise itself. On the one hand, he is concerned to write a history of the Tolai's colonial experience through a series of incidents and a variety of reports or memories of them. The result is not a single history, but rather multiple histories that are themselves montages of varying complexity. In many respects, however, the Tolai history (or histories) is but a vehicle for addressing a larger set of issues about the nature of history and the work of its practitioners. The histories of other peoples would have served equally well." -from the Editor's Note. Exploring history in global framework, Lockard's SOCIETIES, NETWORKS, AND TRANSITIONS: A GLOBAL HISTORY, Fourth Edition, combines the accessibility and cultural richness of a regional approach with the rigor of comparative scholarship. Emphasizing culture, social change, gender issues, economic patterns, science and religion, it helps you unravel the connections, encounters, cooperation and conflicts of world and regional history. The author includes profiles of individuals from various walks of life as well as highlights social life and cultural artifacts such as music, literature and art. Extensively revised, the text incorporates recent scholarship throughout, examines various debates among historians and explains how historians use original documents. Insightful questions help you reflect on the historical significance of text material -- and how it relates to you.
